

Mockup Review Notes: 11.28

Creative Director: Maddy Angstreich

Designer: Maddy Angstreich

1. Either create a two-column layout and have images on one side of the body text with text on the other side, or create an image gallery linked to the homepage.
2. Choose a second typeface for headers rather than using the mono-spaced font for everything. Try a sans serif like Work Sans or IBM Plex
3. Make sure that header image flows across the full width of the page at larger sizes
